Quick Start Guide

Press one of the buttons below to start the system:

- **View Laptop**
  Press this button to display laptop presentation

- **Watch Television**
  Press this button to watch cable television

---

**General Controls**

- **Volume Control**
  Use these buttons to raise and lower the audio level in the room.

- **Speaker Mute**
  Use this button to turn off the speakers in the room.

- **Main Menu**
  Use this button to turn the system off or switch sources.
Most laptops have 3 modes that are cycled through as you press the function + monitor button.

**Laptop Connections**

Connect the VGA, HDMI, or DisplayPort cable to your laptop video port.

If your presentation requires audio, connect the headphone cable attached to the VGA cable to the headphone jack of your laptop. If you are using the HDMI or DisplayPort cable, the audio is part of the digital signal. You can use the volume control on your laptop to adjust the audio level. The audio will be played through the TV speakers.

**Laptop Configuration**

Configure your laptop to display on the Video port. On newer laptops with Windows 7 or higher, the laptop will automatically detect the connection and display your laptop image. If not, press and hold the Windows button and tap P. A window will appear on your laptop screen with options for displaying your image.

With laptops that run on Windows XP or older, you may need to press and hold the Function button while pressing one of the function keys.

The Cable TV IR remote can also be used to control the television tuner. Point the remote at the television when operating.
